

## **BIO ACTIVE WALL**

Bio-active wall elements are designed to induce rapid plant wall coverage of inland buildings. Green plant coverage significantly improves urban landscape, provides cleaner and healthier air, and reduces the ecological footprint of urban development.

The physical and chemical properties of the wall elements strongly influence the capability to support and enhance growth. ECOncrete®'s bio-active wall induces natural growth of wall clinging plants, endolithic algae, lichens and mosses. Its high complexity and porosity create moist niches that support flora, without the need for complex soil systems.

ECOncrete®'s Bio-active wall elements are a great solution for areas like sunken gardens and facades, and can integrate planting pockets for increasing green coverage.

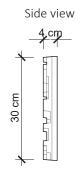

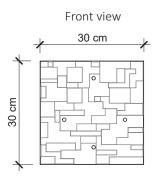

## Standard Tile

Unit Height (cm)	Unit Width (cm)	Unit Depth (cm)	Volume (Litres)	Weight (Kg)
30	30	4	2.3	5.6
(12")	(12")	(1.6")	(140 in³)	(12.3 lbs)

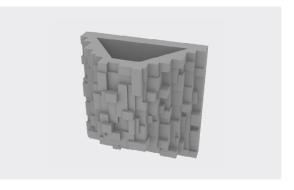

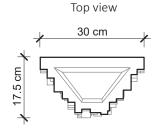

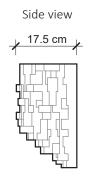

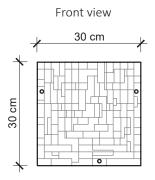

## **Pocket Tile**

Unit Height (cm)	Unit Width (cm)	Unit Depth (cm)	Volume (Litres)	Weight (Kg)
30	30	17.5	6.2	15
(12")	(12")	(7")	(378 in³)	(33 lbs)

ECOncrete® Bio Active wall Tile's dimensions can be fitted to specific project requirements.

The specific concrete matrix used for the casting is defined according to the project's distinct constructive and biological requirements.
