STRUCTURAL PRECAST

Moore Concrete have a wealth of experience in the design and manufacture of standard and non-standard structural precast elements. Amongst the projects undertaken are elements for amphitheatre design, Bebo arches, bridge beams, church pinnacles, ground beams, bridge parapets, Redi-Rock wall systems and pipe weights.

We are always keen to try and meet our Clients' needs, no matter what the individual job specification may be. The jobs listed are only a snapshot of what we do, so please feel free to contact our sales office with any inquiries, or for further information.

AMPHITHEATRE

A series of raiused units were supplied to a project in Corby. Intricate mouldwork is a specialism for the production of accurately dimensioned units.

BEBO ARCHES

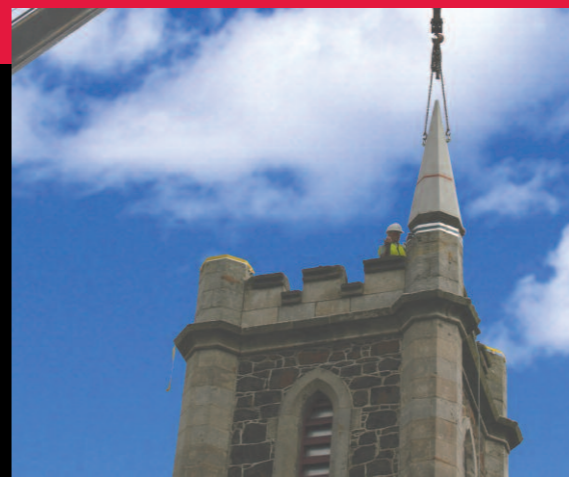

Asset Bebo arches are made for Asset International. Moore Concrete have supplied Bebo arches for bridge construction in England, Wales, Scotland and Ireland. For full range of Bebo products see www.assetint.co.uk

BRIDGE BEAMS

Moore Concrete can produce job-specific reinforced bridge beams for roads and railways.

Concrete is produced to customer specification in accordance with British and European requirements. Self-compacting concrete is also used to produce extra-fine finish.

CHURCH PINNACLES

The manufacture of geometrically challenging units is a specialism.

The company can supply precast pinnacles for the corners of church towers

GROUND BEAMS

Moore Concrete produces ground beams for a number of leading supermarket stores in the UK and Ireland.
